DETAILED ACTION

- 1. This Office action is in response to Applicant's amendment, filed on 10/08/2003.
- 2. Claims 25-47 are pending.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 25-30 and 33-46 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Matsumoto et al. (U.S. Pat. No. 6,320,829) in view of Lacy et al. (U.S. Pat. No. 6,266,419).

As per claims 25, 26 and 33-46 Matsumoto substantially discloses a copy of digital data from a digital recording medium is controlled so as to prevent unauthorized copying. The digital data is transmitted from a transmitter-side to a receiver-side (which is seen to read as Applicant's claimed invention wherein it is stated that a contents rendering control for tailoring of electronic data or a method of controlling filtering of contents data in reproducing or distributing);

wherein control information specifying predetermined filtering has been embedded in the contents data as a digital watermark (see., col 4, lines 7-26, specifically wherein it is stated that the electronic watermark information judgment device determines one of two copy restriction levels from the electronic watermark information, Applicant duly note that the electronic watermark device rendering control of the application information);

extracting the control information from the contents data; deciding how to execute the predetermined filtering of the contents data based on the extracted control information; filtering a predetermined portion of the contents data according to the decision; and reproducing or distributing of the filtered contents data (see., col 4, lines 7-26, col 3, lines 35-67, col 16, lines 31-51, specifically judging device).

Matsumoto fails to explicitly disclose wherein said the contents data comprise a predetermined portion that has been embedded in the contents. However, Lacy discloses a method of compressing media content in which a first predetermined portion of a media content is compressed using a first data-based compression algorithm (see., abstract, col 1, lines 35-67, col 2, lines 9-32). Accordingly, it would have been obvious to a person of ordinary skill in the art at the invention was made to

modify the digital copy of Matsumoto by including the limitation detailed above as taught by Lacy

because this would secure the compressed media content against unauthorized use.

As per claims 27, 28, 29, 30 and 32 Matsumoto discloses the claimed method wherein the

control information includes one or more items of level information for determining whether the

predetermined filtering is to be applied to a specific portion of the contents data; and the step for

filtering comprises determining whether the predetermined filtering is applied to a specific portion of

the contents, based on one or more items of the level information included in the control information

(see., col 6, lines 5-60).

ALLOWABLE SUBJECT MATTER

5. Claim 47 is allowed over the prior art of record.
